We Help You Solve Data Challenges

Total Data Estate Identification for Risk & Assets

Legacy Systems & Paper-Based Records

Change Management & Tracking

Cloud & Data Migration Risks

User Control & Access

Workflow Adoption

D3
Data Discovery Distillation

One Solution = Cost Savings

- ✓ OCR Scanning & Digital Transformation
- ✓ Data Inventory with Metadata
- ✓ Federated Search, Tag & Assign
- ✓ Petabyte Cloud & Data Migrations
- ✓ Automated Risk Filters & Mitigation
- ✓ User-Friendly Dashboards

Key Feature
Unsupervised Metadata Assignment with Customizable Taxonomy

200%+ ROI Typical - Multiple Use Cases

APIs

Security

Data Governance

Data Loss Prevention

Analytics

Retention & Deletion

FOIA, HIPAA & PII Compliance

The **Exponential Growth of Data** Is Both Opportunity & Challenge

Over 80% of data will be unstructured by 2025 and data is expected to grow to 180 zettabytes*

99% of organizations have invested in Big Data and AI initiatives.**

47% of IT leaders say data management challenges result in IT staff time spent on routine tasks rather than supporting strategic business initiatives***

60% say lack of data visibility is a challenge***

*IDC forecasts   **NewVantage Partners Executive Survey   ***IDG report for HPE Discover 2021

D3 Advantage: User-Friendly Usability

Easy-to-Use Dashboards, Accuracy & Multipurpose Results Support Staff Adoption

D3 is a **total solution** for digital transformation, data discovery and governance with integration to other security, data loss prevention and data management systems.

Project Analysis

- ✓ Lean Six Sigma methodologies that encompass process analysis and process improvement recommendations
- ✓ Workflow analysis
- ✓ Identify cost savings

Data Ingestion

- ✓ **Optional:** Scan & assign metadata to physical files and forms
- ✓ Locate & identify over 950+ file types: pdf, images, text, Microsoft Modern Workplace
- ✓ All data stores: cloud, hybrid, on-premises

Data Inventory

- ✓ Unsupervised crawl using ML, natural language processing and pattern matching
- ✓ Automated enrichment with metadata
- ✓ Tags risky files and identifies PII
- ✓ Federated search and tag for remediation

Assign to Workflows

- ✓ Tag, assign & export with user controls
- ✓ APIs to other solutions
- ✓ Monitor and setup ongoing user-defined alerts

Data Challenges Solved by D3

Digitization of Physical Files & Unstructured Files

D3 offers AI OCR scanning and digitization capability in weeks not months with chain-of-custody and dashboard project views. Metadata is assigned for indexing.

Comprehensive Data Inventory with Metadata

D3 is the only solution offering total data estate inventory of petabyte scale unstructured and structured data with unsupervised, accurate, customizable metadata assignment down to the content level.

Timely Regulatory Compliance for FOIA, PII, HIPAA

D3 automated filters and instant federated search with content-level drill down and controls creates huge time savings, setting D3 apart from other solutions.

Cloud & Data Migration Data Cleansing

D3's pattern matching and similar-file filtering plus search and user controls enable removal of ROT (Redundant, Obsolete, Trivial) files for retention schedules, deletion and risk management.

Data Integration for Accurate Analytics

Identify all data assets for mergers and acquisitions and analytics projects. D3's user-friendly dashboards enable content-level drill down, tagging, user controls, and export into other solutions.

we have helped many enterprises and federal agencies achieve digital transformation goals for the past 50 years
